PROFESSIONAL SUMMARY

Final-year B.Tech student in Artificial Intelligence & Data Science (CGPA: 8.67) with hands-on experience building and deploying end-to-end machine learning systems — from model development through production inference. Proficient in Python, TensorFlow, and Scikit-learn, with cloud deployment experience on IBM Watson Studio (AutoAI). Seeking a Data Analyst, Data Scientist, or ML Engineer role to build scalable, production-ready data solutions.

EDUCATION

B.Tech — Artificial Intelligence & Data Science | *Yashoda Technical Campus, Satara* **CGPA: 8.67 | 2023 – 2027**
HSC | *Yashwantrao Chavhan Institute of Science, Satara* **82.83% | 2023**
SSC | *MKSSS's Kanya Shala, Satara* **97.00% | 2021**

TECHNICAL SKILLS

- **Programming Languages:** Python, R, SQL
- **ML / DL Frameworks:** TensorFlow, Scikit-learn, Pandas, NumPy, Librosa , OpenCV
- **Web & App Development:** Flask, Streamlit, React, Jinja2, Leaflet.js
- **Cloud & Databases:** IBM Watson Studio – AutoAI, MySQL, MongoDB, Firebase, PostgreSQL, pgvector
- **Tools & Version Control:** Git, GitHub, Docker
- **AI Domains:** Machine Learning, NLP, Computer Vision, Speech Processing, EDA, Statistical Analysis

PROJECTS

GD Analyzer – AI-Powered Group Discussion Analysis | *Python, Streamlit, Faster-Whisper, Pyannote, Gemini API, FFmpeg, ReportLab*

- Built an AI-powered speech transcription and speaker diarization system using Faster-Whisper and Pyannote, improving speaker attribution via word-level timestamp matching
- Automated per-speaker HR-based performance scoring and communication analysis using the Gemini API, with downloadable PDF reports generated via ReportLab

CRUX – Problem-First Collaboration Platform | *Next.js, TypeScript, FastAPI, PostgreSQL, pgvector, Docker, JWT, AI/ML*

- Built a full-stack platform using Next.js, FastAPI, PostgreSQL, and pgvector, featuring an AI-powered matching engine with 384-dimensional embeddings and HNSW cosine similarity for explainable recommendations
- Implemented JWT/OAuth authentication, role-based authorization, and production security controls, validated by 102 backend tests, 165 end-to-end checks, and API contract testing across 108 endpoints

VocalWings – AI-Powered Bird Species Identification System | *Python, Flask, TensorFlow, Keras, MySQL, CNN, Librosa, GPS GeoMapping*

- Built a CNN-based audio classification system using TensorFlow/Keras and mel-spectrogram features, achieving 89.1% ± 4.5% accuracy via 4-second windowing and probability aggregation
- Integrated live/upload audio prediction, GPS-based GeoMapping and heatmaps, and role-based authentication, with confidence thresholding and an unknown-class detector to prevent unreliable predictions

PUBLICATIONS

- Comparative Analysis of IBM Watson Studio and Python for Business Data Analytics — Peer-reviewed, approved for UGC-Care Journal (Current Affairs Section); publication pending on a higher-impact platform

INTERNSHIPS

Eduskill — Python Full Stack Development Intern 2025

- Built and deployed web applications integrating Python backend frameworks with REST APIs

Edunet — Cloud Computing Intern 2024

- Developed disease prediction models and business analytics pipelines using IBM Watson Studio AutoAI and cloud services

Eisystems — Artificial Intelligence Intern 2024

- Designed and evaluated machine learning models across multiple real-world application domains

CERTIFICATIONS

- Enterprise Data Science in Practice — IBM SkillBuild
- Getting Started with Enterprise AI — IBM SkillBuild
- OpenAI Course Pipeline — DataCamp
- Website Development using WordPress — Coursera

ACHIEVEMENTS

- Hackathon Finalist — IQOO National Hackathon 2026–27
- Hackathon Finalist — PVG COET Innoverse Hackathon 2024–25
- Zonal Finalist — Avishkar Research Competition 2023–24, 2026–27
- District Topper — Dr. Babasaheb Ambedkar Technological University, Lonere
- Technical Head — Department of AI & DS, Yashoda Technical Campus
- Winner — Institutional Chess Competition
- Student Reporter — Sakal YIN (Young Inspirators Network)
